PROFESSIONAL PROFILE

Computer Engineer with 10+ years of hands-on technical experience across software development, web/front-end implementation, QA, infrastructure, databases and digital business systems. I design, build, test and maintain business websites, e-commerce flows, internal tools, APIs, automation scripts and Linux/Windows server environments. I combine practical software engineering, clear documentation, QA discipline and troubleshooting ability for hybrid roles in development, QA, technical support, systems administration and AI/human evaluation workflows.

CORE SKILLS

- **Software & Web Development:** JavaScript, TypeScript, React, Angular, Node.js, Express, HTML, CSS, Python, Java, PHP, WordPress/Elementor, Git/GitHub.
- **QA & Testing:** Manual testing, functional testing, API testing with Postman, Selenium WebDriver, pytest, regression testing, UI/UX checks, defect reporting.
- **Databases & Data:** SQL, PostgreSQL, MySQL/MariaDB, MongoDB, NoSQL, ER diagrams, normalization, PK/FK constraints, data modeling and database administration.
- **Infrastructure & Support:** Ubuntu Server, Linux/Windows administration, Docker Compose, nginx, DNS, SMTP/email, VPN, SSH, Fail2ban, backups, logs and troubleshooting.
- **Content & AI-Human Workflows:** Information architecture, multilingual content, technical documentation, AI evaluation, ethical technology analysis and clear communication.

SELECTED PORTFOLIO CASES

Parche Dulcero - Interactive Harm Reduction Website | 2026

- Designed and built a responsive multilingual website with dark UI, guided navigation, searchable topic cards, downloadable materials and interactive risk/interaction matrices. Tools: HTML, CSS, JavaScript, responsive design, multilingual UI, content architecture, visual QA.

Lactolife.com - Corporate Website & Product Catalog | 2026

- Designed and implemented a corporate website for an artisan dairy brand with homepage, product categories, usage gallery, B2B pages, company story, pricing section, multilingual navigation and direct path to the online store.

Lactolife eShop - Online Store Platform | 2026

- Built an e-commerce storefront with searchable catalog, categories, product cards, account elements, side cart, pricing logic, delivery fee display and checkout-oriented flow. Tools: HTML, CSS, JavaScript, TypeScript, Node.js, Medusa, PostgreSQL.

Ubuntu VPS Administration & Docker Infrastructure

- Administered Ubuntu VPS infrastructure for web, collaboration and business platforms. Managed Linux services, Docker containers, nginx, MariaDB, SSH, DNS, email services, Fail2ban, ISPConfig, logs, monitoring and troubleshooting.

QA, API and Automation Projects

- Selenium UI automation with Page Object Model, API testing with Postman, Python + pytest test automation, Jira defect documentation, expected-vs-actual analysis and reproducible bug reports.

Database and Network Design

- Oracle SQL / 3NF database modeling with ER diagrams, DDL, PK/FK constraints and CHECK constraints; Cisco Packet Tracer network design with IPv4/IPv6, VLANs and connectivity verification.

PROFESSIONAL EXPERIENCE

Lactolife SAS | Computer Engineer - Software, Web, QA & Systems

Jan 2014 - Present | Tocancipa / Bogota D.C., Colombia

- Designed, developed and maintained public websites, e-commerce experiences, catalog pages, pricing pages, B2B sections, internal tools and digital workflows.
- Translated commercial and operational requirements into responsive layouts, structured components, clear web sections, internal systems and user-facing product communication.
- Performed UI/UX verification, responsive checks, API validation, regression testing, defect documentation and pre-deployment validation for web, ERP/CRM, chatbot and infrastructure changes.
- Administered Linux/Windows services, Docker Compose deployments, databases, DNS, SMTP, VPN, Nextcloud intranet, Dolibarr ERP/CRM, server logs and backups.

Parche Dulcero | Web Designer / Front-End Developer

2026 | Remote / Colombia

- Designed and implemented a multilingual, responsive website with modern dark UI, structured topic navigation, downloadable materials and interactive data-heavy tables.
- Focused on clarity, visual consistency, responsive behavior, content architecture, implementation-ready front-end delivery and visual QA.

Freelance | Web / Software Developer & IT Support Engineer

Jan 2010 - Present | Remote

- Built and supported MEAN/MERN web applications, landing pages, business tools and small software projects with functional testing before delivery.

- Diagnosed and resolved bugs with reproducible evidence, screenshots and clear technical communication; installed and administered servers, VPN, mail and web services.

EDUCATION & CERTIFICATIONS

- QA Engineering Certificate - TripleTen, 2025-2026
- Systems Engineering - UNAD, in progress, 2025-present
- Bachelor of Philosophy - Pontificia Universidad Javeriana, 2014-2020
- Full Stack Web Development - BIT, Bogota Institute of Technology, 2022
- Music Technology - Berklee College of Music, 2020
- Engineering Sciences - Universita di Roma Tor Vergata, 2013-2014
