

JUAN F. CAPITANI

QA Engineer | Software Engineer | IT Systems & Infrastructure

juancapitanig@gmail.com | +57 315 700 3692 | Bogotá D.C., Colombia | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL PROFILE

QA Engineer / Software Engineer with 10+ years of hands-on technical experience across enterprise environments, full stack projects, infrastructure, networks, databases and IT support. Focused on manual testing, API testing, Python automation (pytest, Selenium/POM), defect documentation and pre-deployment verification. I have designed, implemented and maintained real systems: Nextcloud intranet, Dolibarr ERP/CRM, WhatsApp chatbot, corporate website/e-commerce, Linux/Windows servers, VPN, DNS/SMTP and SQL databases. Targeting remote roles as QA Engineer, QA Automation Engineer or Software/Systems Engineer with a strong quality mindset.

ROLE FOCUS

QA Engineer | QA Automation | Software Developer | Systems Administrator | Network Administrator | Database Administrator | Data Modeler | IT Maintenance & Support Engineer

TECHNICAL SKILLS

QA: Functional manual testing, test case design, equivalence classes, boundary values, regression, defect documentation, cross-browser, UI/UX testing

Automation: Python, pytest, Selenium WebDriver, Page Object Model, explicit waits, requests

API: Postman, REST, status codes, JSON, response validation, negative testing

Tools: Jira, Git/GitHub, Chrome DevTools, VS Code, PyCharm, draw.io

Development: JavaScript, Node.js, Angular, React, Express, MongoDB, Ruby on Rails, PHP, WordPress

Infrastructure: Docker Compose, Ubuntu/Linux, Windows Server, Nextcloud, Dolibarr ERP/CRM, VPN, SMTP, DNS, Azure AD

Databases: Oracle SQL, PostgreSQL, MySQL, MongoDB, relational design, 3NF normalization

Methods: Agile/Scrum, technical documentation, troubleshooting, remote support

QA PROJECTS

E2E UI Automation - Selenium + Page Object Model (2026)

- Full automation of a taxi booking flow: route, fare, phone with SMS, credit card, extras and order confirmation.
- Clean POM architecture with separate locators, explicit waits and JavaScript execution for dynamic elements.
- Tools: Python, Selenium WebDriver, POM, Explicit Waits, Git/GitHub.

API Test Automation - Python + pytest (2026)

- Automated suite with 9 test functions for positive and negative scenarios: 1 char, 511 chars, special chars, empty, 512 chars and wrong types.
- Modular architecture: configuration, data, requests and tests separated.
- GitHub: github.com/Morphined/api_stand_tests

API Testing with Postman - Delivery Service (2025)

- REST endpoint validation: status codes 200, 201, 400, 404, 409, response structure and error handling.
- Applied equivalence classes, boundary testing and functional testing.
- Defects documented in Jira with steps, expected/actual result and severity.

Manual Test Design - Ride-Sharing Application (2025)

- Identified equivalence classes and boundary values to reduce tests while maintaining coverage.
- Traceable test cases with inputs, steps, expected result and pass/fail; flowcharts and mind maps for user flows.

UI/UX Cross-Browser Testing - Transportation App (2025)

- UI testing across multiple resolutions with Chrome and Firefox DevTools for responsive validation.
- Bug reports in Jira with reproduction steps, comparative screenshots and visual evidence.

DEVELOPMENT & INFRASTRUCTURE PROJECTS

Enterprise infrastructure - Lactolife (12+ years)

- Nextcloud intranet on Docker Compose: OnlyOffice, Talk, calendar, files, GPS and custom branding.
- Dolibarr ERP/CRM: purchase orders, invoicing, inventory, warehouses, POS, fleet, HR and accounting.
- WhatsApp chatbot with Node.js/Baileys for catalog, orders, PQR and live advisor; corporate website + e-shop: lactolife.com.

Software FJ - OOP management system (Python, 2026)

- OOP system with abstract classes, inheritance, polymorphism, 15 custom exceptions and centralized logging.
- 15+ simulation operations covering valid and invalid scenarios. GitHub: github.com/Morphined/software_fj_213023_332

Database design - TransNacional Express (Oracle SQL / 3NF, 2026)

- ER diagram, logical model in Oracle SQL Developer and DDL with 10 normalized tables, PKs, FKs, CHECK constraints and N:M junction tables.

Hospital network design (Cisco Packet Tracer, 2026)

- Dual-stack IPv4/IPv6 topology, VLANs, web/mail servers, APs, medical workstations and IoT; full connectivity verification.

Ticket sales system (Full Stack JS, 2022)

- Full stack web app with Node.js/Express backend and SPA frontend. GitHub: github.com/Morphined/boletas

PROFESSIONAL EXPERIENCE

Lactolife SAS | Technology Engineer - QA, Software, Systems, Network & Database

01/2014 - Present | Tocancipá/Bogotá D.C., Colombia

- QA / verification: designed and executed pre-deployment verification procedures for web, ERP/CRM, chatbot, API and infrastructure changes; documented findings with steps, evidence and acceptance criteria.
- Software development: developed and maintained website/e-commerce, integrations, WhatsApp chatbot and internal scripts using Node.js, Ruby on Rails, PHP, Angular, React and WordPress/Elementor.

- Systems administration: deployed and maintained enterprise services on Ubuntu/Linux, Windows Server and Docker Compose: Nextcloud, Dolibarr ERP/CRM, VPN, mail, backups and operational monitoring.
- Network administration & maintenance: configured and supported networks, DNS, SMTP, Azure AD, remote access, workstations, printers, plant equipment and hardware/software troubleshooting.
- Database administration & design: managed SQL databases, queries, backups, data cleanup, relational modeling and information integrity for commercial and administrative operations.

Freelance | Software Developer & IT Support Engineer

01/2010 - Present | Remote

- Built MEAN/MERN web applications with functional testing before delivery.
- Diagnosed and resolved bugs with reproducible evidence to accelerate fixes.
- Installed and administered servers, VPN, mail and web services.

Bibo Global Opportunity | English Teacher

01/2019 - 07/2019 | Bogotá D.C., Colombia

- Designed structured sessions and gave clear feedback; skills transferred to test documentation and findings reporting.

EDUCATION

- QA Engineering Certificate - TripleTen, 2025-2026
- Systems Engineering - UNAD (in progress, 2025-present)
- Philosophy - Pontificia Universidad Javeriana, 2014-2020
- Full Stack Web Development - BIT, Bogotá Institute of Technology, 2022
- Music Technology - Berklee College of Music, 2020
- Engineering Sciences - Università di Roma Tor Vergata, 2013-2014

LANGUAGES

Spanish (native) | English (bilingual/C1) | Italian (native/B2-C1) | Japanese (basic/working) | Latin and Ancient Greek (working)
